PARTS LIST

Mounting Plate
Universal Holster

TOOLS NEEDED

18mm wrench or socket
1/2 " wrench or socket

STEP 1

Slide your seat as far back as possible.
Remove the bolt nearest the console on either the driver or passenger side (this should correspond to the mount you purchased)
You will need an 18mm wrench for this step.

STEP 2

Insert the mounting plate as shown and replace the existing bolt. Use the supplied bolt to attach the rear of the brace underneath the seat (not pictured). You will need a 1/2" wrench and socket for this step.

STEP 3

Attach holster to mount using provided Velcro strips. Ensure the Velcro strip is positioned on the desired side of the mount (generally the leg facing side).
