

REDROCK^{4X4}

2007-2014 Wrangler Tail Light Guard

Contents:

- (2) - Light Guards
- (8) - Grommets
- (4) - long screws
- (8) - washers
- (4) - short screws

Tools Needed:

Phillips screwdriver

It is recommended that you have an additional person available to help during this installation, parts can be awkward to hold and support by yourself.

Place the plastic spacer between the light guard and the tail light. Use short screws on the inside of the light and long screws on the outside of the light. Be sure to use the washers on the screw heads.

Install the light guard securely. **DO NOT OVERTIGHTEN SCREWS.**

Support the light and remove the 4 stock phillips head screws from the tail light.
