

- Contents:**
- (1) Driver Side Seat Cover
 - (1) Passenger Side Seat Cover
 - (2) Head Rest Covers

Seat Covers (13-18 JK 2-Door) (18+ JL 2-Door)

Step 1
Begin by removing the headrest on each side, and sliding over the new headrest covers. Secure the cover to the headrest by velcroing them in place.

Step 2
With the headrest still removed, pull over the upper seat cover portion and secure by tucking the velcro sleeve in-between the upper and lower part of the seat to the back to velcro in place.

Step 3
Once the upper portion of the seat cover is installed, tuck the seat cover under the tabs for the headrest guides.

Step 4
Install the lower portion of the seat cover to the seat. Tuck the two buckles through the upper and lower seat joint. Route the straps under the seat from front to back. Tuck the seat cover around the seat lever.

Step 5

Connect the (2) front to back and (1) side to side clips to secure the seat cover to the lower portion of the seat. Then pull tight on the strip to ensure the seat cover is tight to the seat.

Step 6

Installation is now complete.
