Antenna Base 18+ Jeep Wrangler JL

Contents:

(1) - Antenna Base

Tools Required:

- Soap & Water
- Clean Towel
- Isopropyl Alcohol

Remove the factory antenna rod. Wash the factory antenna mount with soap and water. Allow the antenna mount time to dry. **Recommended: Wipe the mount down with isopropyl alcohol to ensure the cleanest surface possible.

Familiarize yourself with how the antenna base fits prior to peeling off the tape backing. Then remove the tape backing and apply firm even pressure to ensure proper adhesion.

Reinstall the factory antenna rod. Installation is now complete.
