

Lift Gate Support 97-06 Jeep Wrangler TJ

Contents:

(2) - Lift Gate Supports

Tools Required:

- Flat Head Screw Driver

Using a flat head screw driver, carefully pry in-between the metal retaining clip and the support to release the retaining clip. Then pry the support away from the vehicle. Repeat this for the top and bottom of each support.

Open the rear tailgate to gain access to the lift gate supports.

Carefully press the new support over the ball socket until it clips in place. Repeat this for the top and bottom of each support. Installation is now complete.
