

JK Bullet Antenna Installation Guide

Contents:

- (1) Antenna
- (1) 13mm I.D. Spacer
- (2) 7.5mm I.D. Spacer
- (6) Threaded Antenna Fittings
- (1) Threaded Antenna Spacer

Tools Required:

- Adjustable Wrench

//Step 2:

Assemble the bullet antenna fitting. Using (2) 7.5mm spacers, install them on the threaded fitting first. Then, install (1) 13mm spacer onto the threaded fitting.

//Step 4:

Thread antenna onto vehicle antenna base. Tighten until snug on vehicle. Once antenna is tight, installation is complete.

// Step 1:

Begin by removing your original antenna by using an adjustable wrench and turning the antenna counter clockwise.

//Step 3:

Once all spacers are on the fitting, thread the fitting onto the antenna. Tighten until secure.
