

## LED License Plate Light Installation Guide

Contents:  
(1) LED License Plate Bulb

Tools Required:  
-None

**Step 2:**  
Twist the bulb socket counterclockwise to remove it from the light housing.

**Step 4:**  
Push the socket towards the rear of the mount to allow space for the light in the housing. Press the light back into the license plate mounting bracket.

**Step 1:**  
Locate the factory license plate housing locking tabs. Push them together and pull down to replace the housing from the license plate bracket.

**Step 3:**  
Remove the factory light bulb from the socket. Install the LED light into the socket. **\*\*Note:** Test the light. If the light does not illuminate flip the LED in the socket 180\*.
